

Sebastián Gómez

Buenos Aires city, Argentina
sebasgomezp01@gmail.com

I'm a computer science student with interest in Software Development, Data Science and AI

ABOUT ME

I consider myself a responsible and proactive person with a constant desire to learn, always inquiring and trying to acquire new knowledge and skills. I am passionate about facing problems and solving them, which is why I enjoy mathematics and programming.

PROJECTS

Reading Tracker

Reading Tracker is a web application where users can save their readings to maintain a record. Basic CRUD operations—Create, Read, Update, and Delete—can be performed on books. I used Java with Spring Boot for the backend, along with dependencies like Spring Security and Spring Data Rest, among others. Authentication is handled using JSON Web Tokens (JWT). The frontend is built with JavaScript using Vue, and the database is PostgreSQL. For deployment I used Docker and Nginx.

Arda social network

Arda is a social network where users can share posts on different topics, make comments, and follow each other, among other functionalities. The user interface was inspired by X/Twitter and Reddit. The technologies I used were Spring Boot for the backend with dependencies like Spring Security, Spring Data REST, and Spring Data JPA. Authentication is handled with JSON Web Tokens, and the data is stored in a MariaDB relational database. On the frontend, I use React with TypeScript.

EDUCATION

Computer Science, FCEyN, UBA

2021 - Present

Bachelor's degree + MSc in computer science.

SKILLS

Java
Spring/Spring Boot
JavaScript/TypeScript
ReactJS
VueJS
HTML, CSS
PostgreSQL
MariaDB
C/C++
Linux
Bash
Docker
