

Sebastián Gómez

Software developer and Computer Science student

Buenos Aires city, Argentina
sebasgomezp01@gmail.com

ABOUT ME

Strong analytical and problem-solving professional with a proven ability to collaborate within cross-functional teams. Possess a product-driven mindset, prioritizing the client needs and user experience throughout every stage of the development lifecycle.

EXPERIENCE

Software Engineer - RAY

March 2025 - Present

I develop new frontend and backend features for the web application using technologies such as Java, Spring, TypeScript, JavaScript, React, Next.js, Docker, MySQL, and PostgreSQL. Some of my major challenges and achievements include:

Managing production deployments and promptly resolving bugs in live environments.

Leading the end-to-end development and monitoring of a major feature involving data manipulation, third-party API integrations, batch processing, multithreading, and user notifications. This initiative successfully increased user engagement and product trust while automating manual tasks for the Customer Success team.

Migrating and upgrading the client onboarding and login workflows to meet new product requirements. This enhancement improved the initial user experience, boosted client satisfaction, and eliminated manual processes.

EDUCATION

Computer Science, FCEyN, UBA

2021 - Present

Bachelor's degree + MSc in computer science.

SKILLS

Java
Spring/Spring Boot
JavaScript/TypeScript
ReactJS
NextJS
HTML, CSS
MySQL
PostgreSQL
MariaDB
Linux
Bash
Docker
C/C++
